KAUNAS AREA STUDY

This memorandum is for record purposes only. No distribution will be made.

Requirement DP-HTA-RH-57 requested a photographic analysis to determine the present conditions of roads, railroads, man-made structures, vegetation cover, cleared land and extent of swamps in an area around KAUNAS, Lithuania.

Nine maps (scale 1:50,000) covering approximately 1050 sq. miles generally covered the requested area. Each map was carefully evaluated on the basis of [REDACTED] and changes in vegetation, culture and etc. were shown on each overlay. These overlays were then carefully examined by the requester and after consultation and coordination with the P.I. analyst, a specific area was designated for detail study.

A detailed sketch map of the selected area was prepared showing culture, vegetation cover, military zones, and congested areas. Recommended routes of movement were shown and well traveled or principal roads were so annotated.

In addition, the requester, working in the Talent Center, in close consultation and coordination with the P.I. analyst, prepared a detailed description of the selected area. The original and two copies of the

area description and two transparent ozalid foils and four ozalid paper copies of the sketch map were sent by courier to the DD/P Talent Control Officer on 27 March 1957.

The original sketch map and one copy of the area description is on file in HTA - Geographic Branch.
